

TEACHERS, you are invited to a hybrid event

2020 Galaxy Forum

"Artemis and Beyond"

Learn about NASA's  
biggest mission since  
the 1970's—the  
return to the MOON!

**Saturday, Oct 24**

at the Cosmosphere

Hutchinson

1-2:30 p.m.

This FREE event will be a hybrid w/  
in-person & virtual presentations.  
Social distancing and masks  
required for in-person attendees.  
Limited seating. Registration to  
[jeanettesteinert@att.net](mailto:jeanettesteinert@att.net)

OR

Watch LIVE on our Ad Astra Kansas  
FACEBOOK page. No registration.  
needed.

**Purpose:** To provide teachers with an overview of the scope of the historic Artemis Program in a way they can take back to students.

**Objectives:**

Teachers will:

1. Gain enhanced knowledge of the stages and steps in putting humans back on the Moon from a person directly involved with the Artemis Program.
2. Learn more about Earth's only satellite and what astronauts can expect to / hope to find.
3. Be apprised of the Perseverance rover's mission and its role in the future of Mars exploration.
4. Be introduced to other interstellar-related projects.

Teachers can correlate with state science standards. Q and A after presentations. Geared towards middle school up.

**More Information:**

For bios on speakers, go [here](#).
